

result™
Active microbials inoculant for Small Grains

KEEP OUT OF REACH OF CHILDREN
READ THE LABEL BEFORE USING

Guaranteed Analysis

Arthrobacter globiformis >5 x 10⁹cfu/gr
Erwinia gerundensis >5x10⁹ cfu/gr
Inerts 62%

Purpose Statement

How it works

result™ inoculant fortifies natural microbial populations and enhances microbial activity in the root environment. RESULT's proprietary microbial strains and increased soil microbial activity improves nutrient availability and uptake by plant roots from the soil and supports increased yield potential in small grains.

Direction for use

- Add 75 grams (~ 2.5 oz) **result™** per liter (1qt) of tap water by filling the tank with half the required water, adding the **result™** granules, and then adding the rest of the water.
 - Agitate for 5 minutes. Make sure that the granules are completely suspended and there are no clumps.
 - Maintain agitation during application to avoid settling.
 - Apply the **result™** suspension uniformly to seed at a rate of 0.135-liter (4.5 fl oz) of prepared suspension per 45kg (100 lbs.) seed.
- For best results, apply the suspension within 3 hours of preparation.

Tank Mix Restrictions

result™ has not been tested for compatibility with all possible seed treatments. Do not mix **result™** with other seed treatment products. When applying RESULT with other products, use separate pre-mix tanks and nozzles to prepare and apply the suspensions simultaneously.

Precautions

Wear appropriate protective clothing and equipment including gloves, safety glasses and a NIOSH approved respirator. In case of direct contact with skin or eyes, immediately flush the exposed area with water. Seek medical attention if irritation develops or persists.

Storage and handling instructions

result™ contains live naturally occurring microorganisms. To ensure optimum viability and performance keep container tightly closed. Store in a cool dry place (less than 70° F) and away from sunlight and heat sources.
Unused **result™** product or suspensions and seed treated with RESULT should be disposed of according to applicable federal, state, and local regulations.
